

Drs. Atwood and Read-Daily present and publish engineering education research at ASEE National Conference in Indianapolis

Dr. Sara Atwood and Dr. Brenda Read-Daily participated in the American Society for Engineering Education's Annual Conference in Indianapolis in June 2014 with peer-reviewed papers on "Using Standards-based Grading to Effectively Assess Project-based Design Courses" (Atwood) in the Design in Engineering Education Division, and "Integrating Environmental Engineering and Sustainability into Engineering Science and General Engineering Programs" (Read-Daily) in the Environmental Engineering Division. The annual conference draws approximately 4,000 attendees from around the world and features papers on teaching pedagogy and novel methods for teaching engineering.
